- ✚ FIRE SYSTEM MIC CONSULTING
- ✚ DOMESTIC SYSTEMS
- ✚ WET PAINT BOOTHS
- ✚ WASTE TREATMENT
- ✚ ZERO DISCHARGE
- ✚ SPC TRAINING
- ✚ SEMINAR PRODUCTIONS FOR INDUSTRY PROVIDERS
- ✚ THIRD PARTY REFERENCING FOR NCD (NON CHEMICAL DEVICES)

WAM consultant process startup and continuous program support

- 1) Source chemical products – continually providing highest quality – highest value technology for boiler pretreatment, condensate, cooling water, closed loops, waste treatment and process coolants.
- 2) Source testing supplies sufficient to evaluate all programs.
- 3) Provide initial training and subsequent material to fully facilitate in house management of the program.
- 4) Implement Federal, State and local Legionella prevention practices for towers - using OSHA, ASHRAE CTI and or AWT recommendations
- 5) Consultant services will be included in all equipment inspections; providing analysis & recommendations based on results.
- 6) Visit each facility at least once a quarter for Q&A, situational analysis along with program reviews.
- 7) Provide forward moving recommendations to facility personnel and management; incorporating the Quality Improvement Process utilizing statistical process control in evaluation and return on investment.
- 8) Investigate new technologies to help reduce their dependency of chemical additives.
